Re: Substance Abuse Evaluation

To whom it may concern:

I performed a basic substance abuse assessment for Ms. Brock in reference to her January 2009 OVI charge. This assessment included the administration of: a MAST, an AUDIT, and a clinical interview. The following are my findings and recommendations:

Substance(s) of Concern: alcohol

MAST: score=4; indicates early to middle stage problem alcohol use; lifetime frame of reference

AUDIT: score=7; scores of "8" or more indicate hazardous alcohol use; past year frame of reference

DSM/Other Substance Related Concerns: blood alcohol level at .26; family history of substance use concerns

Depression Screening: no clinically significant concerns reported

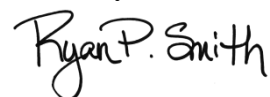

Clinical Interview/Summary: Ms. Brock's written screenings provided some indications of an alcohol use disorder. She reported her normal use of alcohol as 3-4 standard drinks on 2 occasions per month. Her clinical interview did not evidence signs or symptoms of tolerance, use beyond intention, preoccupation with alcohol use, use despite negative consequences, or evidence signs of an alcohol withdrawal syndrome. Ms. Brock's clinical interview did not reveal other more subtle signs of a current alcohol use disorder. At present Ms. Brock does not appear to have indications of an alcohol use disorder though she previously met criteria for a moderate alcohol use disorder.

DIAGNOSIS in reference to substances: 303.90 moderate alcohol use disorder, sustained full remission

Recommendations: 1) Driver Intervention Program, recommend Ms. Brock attend a 3-day driver intervention program certified by the Ohio Department of Mental Health and Addiction Services (contact Wellness Driver, 614-791-8300); 2) If another negative consequence is incurred as a result of any alcohol use within the next year, it is recommended that Ms. Brock seek further evaluation and follow all updated treatment recommendations.

Ms. Brock has signed a release to communicate the results of this assessment to you. Feel free to contact me should you have any questions about this assessment.

Sincerely,

Ryan P. Smith, MSW, LISW-S, LCDC-III, SAP
