Re: Substance Abuse Assessment for Ryan Hunter

Dear Ms. Carlson:

I performed a basic substance abuse assessment for Mr. Hunter in reference to his August 2013 OVI charge. This assessment included the administration of: a SASSI-3, a MAST, an AUDIT, a depression screening, and a clinical interview. The following are my findings and recommendations:

SASSI-3: all scores indicate a low probability of a current alcohol use disorder

MAST: score=0; indicates no apparent problem with alcohol

AUDIT: score=2; scores of "8" or more indicate hazardous alcohol use

DSM/Other Substance Related Concerns: slight family history of problematic alcohol use; previous alcohol-related charge in January 2010

Depression Screening: no clinically significant concerns reported

Clinical Interview/Summary: Mr. Hunter's written screenings provided no indication of an alcohol use disorder of any kind. He reported his past two year alcohol use as one occasion per week with a typical range of 1-2 standard drinks. He reported that his alcohol use will increase to 2-3 standard drinks on 3-4 special occasions per year although he did not report experiencing any negative consequences with his increased consumption. Mr. Hunter did not evidence symptoms of preoccupation with alcohol use, use despite negative consequences, or loss of control of his alcohol use. Mr. Hunter's clinical interview did not reveal other subtle signs of indications of an alcohol use disorder. Mr. Hunter reported that he has already attended MADD's Victim Impact Panel and Wellness Driver's 72-hour driver intervention program.

DIAGNOSIS in reference to substances: NA/Nil

Recommendations: 1) There are no further clinical recommendations at this time. If, however, another negative consequence is incurred as a result of any alcohol use within the next twelve months, it is recommended Mr. Hunter seek further evaluation and follow all updated treatment recommendations.

Mr. Hunter has signed a release to communicate the results of this assessment to you. Feel free to contact me should you have any questions about this assessment.

Sincerely,

Ryan P. Smith, LISW-S, SAP, LCDC-III
