Carmell Sabaugh, Clerk of Courts
Macomb County Municipal Court

Re: Clinical Alcohol Assessment for Michael Shalayko

Dear Ms. Sabaugh:

I performed a Clinical Alcohol Assessment for Mr. Shalayko in reference to his pending impaired driving charge in Macomb County (@ .13 BAC, July 31, 2014). This assessment included the administration of: a Michigan Alcohol Screening Test (MAST), an Alcohol Use Disorder Identification Test (AUDIT), an anxiety/depression screening, and a 50 minute face-to-face videoconferenced clinical interview. The following are my findings and recommendations:

MAST: score = 4; all points due to DUI history, screen further for clarification

AUDIT: score = 7; scores above 8 = clear indication of hazardous use, above 13 indicates moderate to severe disorder present, screen further for clarification

DSM/Other Substance Related Concerns: appears to meet 2 of 11 DSM 5 alcohol use symptoms

Anxiety/Depression Screening: no clinically significant concerns reported

Substance Related Legal History Reported: February 2004 (DUI @ .14BAC)

Clinical Interview/Summary: Mr. Shalayko's written screenings suggested presented some mild problem symptoms which warranted an attempt to make further clarification in the clinical interview. He reported his normal use of alcohol as 2-3 occasions per week in a controllable manner and setting (up to 4 drinks). He also acknowledged times and settings where he might drink more than 4 drinks. Due to the times where he exceeded this amount I found him meeting two DSM 5 mild alcohol use disorder criteria (mild *tolerance* and *hazardous use*). Mr. Shalayko stated that he has complied with his order to abstain from all alcohol and has begun attending AA meetings in a meaningful manner. My recommendations will simply encourage Mr. Shalayko to continue his progress at AA and comply with all court requirements including the use of an interlock device on his vehicle.

DSM 5 DIAGNOSIS in reference to substances: 305.00 (mild alcohol use disorder)

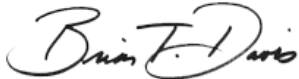

Treatment Recommendations:

- 1) Continue AA Attendance: recommend 2-3 meetings per week, minimum of 20 meetings

- 2) If another negative consequence is incurred as a result of any alcohol use it is recommended Mr. Shalayko seek further evaluation and follow all treatment recommendations.

Thank you for the opportunity to assist the court in this important matter. If you have any additional questions about his condition, please request a signed release of information and I will be glad to assist further.

Sincerely,

Brian Davis, LISW-S, SAP
cc: Michael Shalayko

Prohibition Against Re-Disclosure: This information has been disclosed to you from records protected by Federal Confidentiality rules. The Federal rules prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains or as otherwise permitted by 42 C.F.R Part 2. A general authorization for the release of medical or other information is not sufficient for this purpose. The Federal rules restrict any use of information to criminally investigate or prosecute any alcohol or drug abuse client. Drug abuse patient records are also protected under the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), 45 C.R.R parts 160 & 165. (These conditions apply to every page disclosed and a copy of this authorization will accompany every disclosure.)

Diagnostic Conclusions / Limitations: Directions Counseling Group provides Clinical Alcohol Assessments based on objective and standardized screenings and interviewing methods as well as self-reported information. Clinical conclusions are made to the best of the professional's ability with data on hand at the time of the assessment. Expanded assessments which involve additional background research, collateral information and third party verification can be provided as an additional service upon request.
