Re: Clinical Alcohol Assessment for Michelle Lemoine

Dear Mr. Penn:

I performed a Clinical Alcohol Assessment for Ms. Lemoine in reference to her pending 9/2013 DWI charge. This assessment included the administration of: a MAST, an AUDIT, an anxiety/depression screening, and a 45 minute clinical interview. The following are my findings and recommendations:

MAST: score =0; no direct or indirect indication of problem alcohol use

AUDIT: score = 3/ low likelihood of an alcohol use disorder; "8" is the generally accepted threshold score for an indication of a likely alcohol use disorder

DSM/Other Substance Related Concerns: 0 of 11 alcohol use disorder symptoms found in clinical interview

Anxiety/Depression Screening: no clinically significant concerns reported

Substance Related Legal History Reported: denies any previous history of alcohol or substance related arrests/legal charges; reported 9/2013 DUI as having a BAC of .10

Clinical Interview/Summary: Ms. Lemoine's written screenings provided no indication of an alcohol use disorder at any level. She reported her normal alcohol use as 1-2 drinks on 2-4 occasions per month and the same type of consumption if attending a celebratory event (wedding, birthday, etc.). We discussed her DUI charge at length and the circumstances that lead to her arrest. Ultimately I was unable to find her meeting DSM 5 criteria for any alcohol use disorder. Ms. Lemoine accepted full responsibility for her actions and was very articulate about not repeating this behavior as it could put her career in jeopardy were she to have a future alcohol related arrest. I am recommending that she attend complete a basic alcohol education course as a standard preventative measure.

DSM 5 DIAGNOSIS in reference to substances: None Found

Recommendations: **1)** Alcohol Education, recommend completion of a local Victim Impact Panel, MADD class or other basic alcohol education course (minimum of 2 hours); **2)** If Ms. Lemoine incurs another negative consequence from the use of alcohol it is recommended that she obtain an updated evaluation and follow all professional recommendations.

Ms. Lemoine was fully cooperative in this assessment process. If you have any additional questions about her condition with regards to alcohol use, please request a signed release of information and I will be glad to assist further.

Sincerely,

A handwritten signature in black ink that reads "Brian F. Davis". The signature is fluid and cursive, with the first name "Brian" and last name "Davis" clearly legible.

Brian Davis, LISW-S, SAP
cc: Michelle Lemoine
