

Questionnaire Introduction:

This questionnaire is designed to provide you with a professional and accurate assessment of your use of a substance(s). You will benefit most if your answers are honest and direct. Don't over-think your answers. There are no trick questions. You must enter a response for each question for completion before your interview. You will be able to discuss details, change answers or explain your answers when you speak to your evaluator.

People often complete the questionnaire in 15 minutes but you have 90 minutes to complete it in one sitting. If you run over the 90 minute time limit & don't worry- your answers will be saved and you may log in again to resume the questionnaire where you left off.

Questions in red have not been attempted or submitted.

Questions marked green indicate you successfully completed and submitted an answer.

Assessment - AA test assessment

Total Questions - 8

Total given time - 90 minutes
