**Re: Clinical Alcohol Assessment for Manuel Prado**

Dear Probation Department Representative:

I performed a Clinical Alcohol Assessment for Mr. Prado in reference to his pending January 2014 OVI charge. This assessment included the administration of: a SASSI-3, a MAST, an anxiety/ depression screening, and a clinical interview. The following are my findings and recommendations:

**SASSI-3:** no scores indicative of an alcohol use disorder at any level

**MAST:** score = 1 ; no direct or indirect indications of problem alcohol use

**AUDIT:** score = 3; no apparent problem alcohol use

**DSM/Other Substance Related Concerns:** denies subtle indicators of problem alcohol use including mild hangovers, mild memory loss after use, regular use to relieve emotional or work stress, previous treatment, conflict with significant others during or shortly after use of alcohol, guilt or regret associated with use/ DUI history concerning

**Anxiety/Depression Screening:** no clinically significant concerns reported

**Substance Related Legal History Reported:** DUI approx. 1991, DUI approx.. 2008

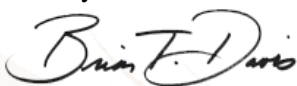

**Clinical Interview/Summary:** Mr. Prado's written screenings provided no indication of an alcohol use disorder of any kind. He reported his typical use of alcohol as 2-4 standard drinks on 2 occasions per month. He also acknowledged use of up to 3-5 standard drinks on infrequent occasions of a special celebration. While I was unable to find him meeting any DSM 5 alcohol use disorder criteria I expressed concern that he had a history of 3 DUI charges. Even though there may have been mitigating circumstances involved in some of his charges I thought it best to recommend some preventative education at a minimum. That recommendation is found below.

**DSM 5 DIAGNOSIS in reference to substances:** None Found

**Recommendations:** 1) Education, recommend 9 hrs. of Ohio Health's Drug/Alcohol Awareness Series (contact 614-566-3700); 2) If another negative consequence is incurred as a result of alcohol use it is recommended Mr. Prado seek further evaluation and follow all treatment recommendations.
