**Re: Alcohol Assessment for April Driehaus**

Dear Mr. McMain:

I performed a basic alcohol substance abuse assessment for Ms. Driehaus in reference to her 12/4/2013 alcohol intoxication charge. This assessment included the administration of: a MAST, an AUDIT, a depression screening, and a clinical interview. The following are my findings and recommendations:

**Substance(s) of Concern:** alcohol

**MAST:** score = 0; indicates no apparent or overt signs/symptoms of an alcohol use disorder

**AUDIT:** score= 1; no indication of an alcohol use disorder of any kind

**Substance Related Legal History Reported:** one incident in college

**DSM/Other Substance Related Concerns:** no overt or subtle symptoms observed or reported that are associated with a DSM 5 alcohol use disorders

**Anxiety/ Depression Screening:** reported grief and loss associated with 3 recent deaths in the family, including her husband in 2011, as well as recent hip replacement; receives professional medical treatment for anxiety, denies misuse abuse of any prescriptions; no clinical crisis indicated

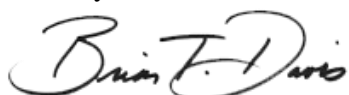

**Clinical Interview/Summary:** Ms. Driehaus' written screenings provided no indication of a DSM 5 alcohol use disorder. She reported her use of alcohol as 1-2 drinks on about 6 occasions per year but acknowledged that she had consumed 3 drinks with a friend on the day of her alcohol intoxication charge. This was also the anniversary of her husband's death and she admitted giving herself some extra permission on that day. After a careful interview and review of her written screenings I was unable to find Ms. Driehaus meeting criteria for a DSM 5 alcohol use disorder. I did share general cautions with her about mixing alcohol and medications, drinking more than 2 drinks, and some other general preventative recommendations. Ms. Driehaus was very cooperative and engaged in our interview.

**DIAGNOSIS in reference to Substances:** None Found

**Recommendations:** I have no further professional recommendations for Ms. Driehaus at this time.

**Prohibition Against Re-Disclosure:** This information has been disclosed to you from records protected by Federal Confidentiality rules. The Federal rules prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains or as otherwise permitted by 42 C.F.R Part 2. A general authorization for the release of medical or other information is not sufficient for this purpose. The Federal rules restrict any use of information to criminally investigate or prosecute any alcohol or drug abuse client. Drug abuse patient records are also protected under the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), 45 C.R.R parts 160 & 165.

Sincerely,

Brian T. Davis, LISW-S, SAP
