**Re: Substance Abuse Assessment**

To whom it may concern:

I performed a basic\* substance abuse assessment for Mr. Young in reference to his March 2014 underage consumption charge. This assessment included the administration of: a SASSI-3, a MAST, an AUDIT, a depression screening, and a clinical interview. The following are my findings and recommendations:

**SASSI-3:** all scores indicate a low probability of a current alcohol use disorder

**MAST:** score=1; indicates no apparent problem with alcohol

**AUDIT:** score=4; scores of "8" or more indicate hazardous alcohol use

**DSM/Other Substance Related Concerns:** no other concerns noted or reported

**Depression Screening:** no clinically significant concerns reported

**Clinical Interview/Summary:** Mr. Young's written screenings provided no indication of an alcohol use disorder of any kind. He reported his only use of alcohol occurred on the night of his aforementioned charge. Mr. Young's clinical interview did not evidence symptoms of preoccupation with alcohol use, use despite negative consequences, or loss of control of his alcohol use. Mr. Young's clinical interview did not reveal other subtle signs of indications of an alcohol use disorder. Mr. Young is presently abstaining from alcohol and has reported no difficulties in gaining or maintaining an abstinence from alcohol over the past four months.

**DIAGNOSIS in reference to substances:** NA/Nil

**Recommendations:** 1) There are no further clinical recommendations at this time. If, however, another negative consequence is incurred as a result of any alcohol use within the next twelve months, it is recommended Mr. Young seek further evaluation and follow all updated treatment recommendations.

Sincerely,

Ryan P. Smith, LISW-S, SAP, LCDC-III

\*Basic substance abuse assessments are based on objective and standardized screenings and interviewing methods. Conclusions made are to the best of the professional's ability with data on hand at the time of the assessment. Expanded assessments which involve extensive background research, collateral information and third party verification can be provided as an additional service upon request.
