

## **CLINICAL ALCOHOL ASSESSMENT**

---

**Date:** 4/1/2014  
**Client:** Robert Barr  
**Incident:** 12/19 /13 Indiana OVWI charge  
**Case#:** 130004686

**Judge:** unknown  
**Counsel:** Angela Dow Davis  
McClure, McClure & Davis  
235 N. Delaware St  
Indianapolis, IN 46204

### **SCREENING OVERVIEW**

**MAST:** score = 1; no overt signs/symptoms of an alcohol use disorder

**AUDIT Result:** score = 2; acknowledges moderate alcohol use

**DSM/Substance Related Concerns:** no signs reported or detected

**ANXIETY/DEPRESSION SCREEN:** no indication of problem symptoms

**LEGAL SUBSTANCE HISTORY REPORTED:** denies prior legal history

**REVIEW OF ARREST REPORT:** Mr. Barr disputes the factualness of the report and stated that he was unable to provide a breath sample because he had chest pain from the accident that occurred. He stated that he offered to allow his blood to be drawn to demonstrate his sobriety but he was not provided the opportunity to do so.

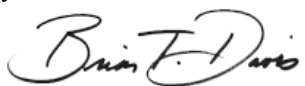

**CLINICAL INTERVIEW SUMMARY** Mr. Barr's written screenings provided no indications of an alcohol use disorder at any level. He reported his frequency of alcohol use as being once a month at most (12 times per year or less), consuming between 2 and 3 drinks per occasion. He denied use beyond this level if he was at a special occasion or celebration.

Mr. Barr's report of his arrest is contradictory with the arresting officer's report, so I looked for additional signs/symptoms of an alcohol use disorder. Since I was unable to find any, and he has no prior alcohol related arrests Mr. Barr does not appear to meet minimum criteria (2 symptoms) for a DSM 5 alcohol use disorder at this time. If the court possesses evidence that Mr. Barr has other recent alcohol related arrests, my professional opinion could be influenced and I would be willing to amend this assessment accordingly.

**DSM 5 SUBSTANCE USE DIAGNOSIS:** None Found

**TREATMENT RECOMMENDATIONS** A standard preventative recommendation for Mr. Barr is to attend some brief alcohol education. He provided me with evidence of his completion of a MADD Victim Impact Panel on March 20, 2014. Therefore I have no further professional recommendations for Mr. Barr at this time.

Respectfully,
