Re: Clinical Alcohol Assessment for Ryan Vogt

Dear Ms. Parsons:

I performed a Clinical Alcohol Assessment for Mr. Vogt in reference to his OVI charge in Franklin County in January of 2015. This assessment included the administration of:

- Michigan Alcohol Screening Test (MAST)
- Alcohol Use Disorder Identification Test (AUDIT)
- General anxiety/depression screening
- Clinical interview by telephone

The following items provide a summary of the screening results, my diagnostic opinion and professional recommendations:

MAST: POSITIVE SCREEN; screening revealed some misuse of alcohol use over the last 5 years (screening appeared valid)

AUDIT: score = 1 / **NEGATIVE SCREEN;** scores above 8 indicate hazardous use, above 13 indicates moderate to severe disorder present (respondent appeared to provide forthright responses to questions)

DSM/Other Substance Related Concerns: clinical interview revealed 0 of 11 DSM 5 substance related symptoms found.

Anxiety/Depression Screening: no clinically significant concerns reported

Substance Related Legal History Reported: acknowledges prior OVI in November of 2013

Clinical Interview/Summary: Mr. Vogt's written screenings and clinical interview revealed some conflicting information with his MAST revealing some misuse of alcohol over the past 5 years and the AUDIT score being negative for misuse. He reported his normal use of alcohol as 2-3 drinks, 1 time per month or less. He also acknowledged use of 3-5 drinks on special occasions (weddings, birthdays, etc.) or on about 2 occasions per year. Mr. Vogt and I discussed his OVI incident and the circumstances present on the evening of his charges. I do have some concern that this was Mr. Vogt's second alcohol related charge in a 2 year timeframe. Although I do commend Mr. Vogt for his report of current moderate drinking behaviors, I would like for him to be seen by a

substance abuse professional for 3-4 sessions because of the discrepancies above and for prevention purposes going forward. I understand that Mr. Vogt was mandated by the court to attend a MADD Victim Impact Panel and a local driver intervention program. I concur with the court's decision regarding this and find this to be appropriate in light of his charges.

DSM 5 DIAGNOSIS in reference to substances: 305.00 (rule out mild alcohol use disorder due to clinical findings)

Treatment Recommendations:

- 1) Counseling, recommend 3-4 outpatient sessions with a professional substance abuse counselor; update recommendations at session four;
- 2) If another negative consequence is incurred as a result of any alcohol use it is recommended Mr. Vogt seek an increased level of treatment or extended outpatient substance abuse counseling as appropriate;

Thank you for the opportunity to assist the court, Mr. Vogt, and yourself in this important matter.

Sincerely,

Anita McLeod, LCSW, SAP
cc: Ryan Vogt

Prohibition Against Re-Disclosure: This information has been disclosed to you from records protected by Federal Confidentiality rules. The Federal rules prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains or as otherwise permitted by 42 C.F.R Part 2. A general authorization for the release of medical or other information is not sufficient for this purpose. The Federal rules restrict any use of information to criminally investigate or prosecute any alcohol or drug abuse client. Drug abuse patient records are also protected under the Health Insurance Portability and Accountability Act of 1996 ("HIPAA"), 45 C.R.R parts 160 & 165. (These conditions apply to every page disclosed and a copy of this authorization will accompany every disclosure.)

Diagnostic Conclusions / Limitations: Directions Counseling Group provides Clinical Alcohol Assessments based on objective and standardized screenings and interviewing methods as well as self-reported information. Clinical conclusions are made to the best of the professional's ability with data on hand at the time of the assessment. Expanded assessments which involve additional background research, collateral information and third party verification can be provided as an additional service upon request.
