Re: Alcohol Assessment for Steven McCornack

Dear Mr. Noble:

I performed a basic alcohol assessment for Mr. McCornack in reference to his pending OVI charge (9/2013). This assessment included the administration of: a MAST, an AUDIT, a SASSI-3, an anxiety/depression screening, and a clinical interview. The following are my findings and recommendations:

Substance(s) of Concern: alcohol only

MAST: score = 0; indicates no apparent or overt signs/symptoms of an alcohol use disorder

AUDIT: score = 1; no indication of an alcohol use disorder

SASSI-3: all scores negative for DSM 5 drug and alcohol use disorders; validity score of "6" suggests a valid screening with reasonably accurate answers being provided by respondent

DSM/Other Substance Related Concerns: denies subtle indicators of problem alcohol use including mild hangovers, mild memory loss after use, occasional use to relieve emotional or work stress, previous legal consequences, previous treatment, conflict with significant others during or shortly after use of alcohol, guilt or regret associated with use.

Substance Related Legal History Reported: 9/2013; denies any previous history of alcohol or substance related arrests/legal charges

Anxiety/Depression Screening: no clinical symptoms reported or detected

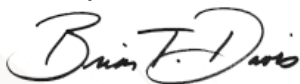

Clinical Interview/Summary: Mr. McCornack's three written screenings were internally consistent and provided no indication of an alcohol use disorder. He reported his frequency of alcohol use as being between one and three times per month. He also reported his typical use as being 1-2 drinks per occasion but acknowledged that for a celebration he might drink 2-3 standard drinks (6 or less occasions per year) or up to 5 drinks in one day if on vacation (1-2/year). While his September 2013 OVI charge is of concern, I was unable to find a pattern of hazardous use or that Mr. McCornack has met criteria defined by the DSM 5 for an alcohol use disorder of any kind.

DIAGNOSIS in reference to Alcohol Use: None Found

Recommendations: I have no further professional recommendations for Mr. McCornack at this time.

Mr. McCornack has signed a release of information for us to speak if you have further questions, don't hesitate to contact me.

Sincerely,

Brian Davis, LISW-S, SAP
cc: Steven McCornack
