Re: Alcohol Assessment for Oleg Dresvyannikov

Dear Mr. Rieser:

I performed a basic alcohol assessment for Mr. Dresvyannikov in reference to his underage alcohol and obstruction charges. This assessment included the administration of: a MAST, an AUDIT, a SASSI-3, an anxiety/ depression screening, and a clinical interview. The following are my findings and recommendations:

Substance(s) of Concern: alcohol only

MAST: score = 2; indicates no apparent or overt signs/symptoms of an alcohol use disorder

AUDIT: score= 1; no indication of an alcohol use disorder

DSM/Other Substance Related Concerns: denies subtle indicators of problem alcohol use including mild hangovers, mild memory loss after use, occasional use to relieve emotional or work stress, previous assessment or education, conflict with significant others during or shortly after use of alcohol, guilt or regret associated with use.

Substance Related Legal History Reported: denies any previous history of alcohol or substance related arrests/legal charges

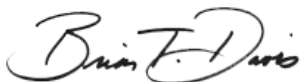

Anxiety/Depression Screening: no clinical symptoms reported or detected

Clinical Interview/Summary: Mr. Dresvyannikov's written screenings gave no indication of an alcohol use disorder. He acknowledged periodic use of alcohol with his peers but denied experiencing symptoms that would indicate he is experiencing an alcohol use disorder. Ultimately I was unable to find him meeting criteria for a DSM 5 alcohol use disorder. We talked at length about his use of alcohol on a number of occasions including the use related to his legal charge. He appeared to be learning from his situation (reported he is currently abstaining) and I am recommending that he attend Ohio Health's alcohol and drug awareness class to further increase his knowledge of the risks of substance use from multiple perspectives.

DIAGNOSIS in reference to Alcohol Use: None Found

Recommendations: 1) Preventative Education, complete the 9 hour Ohio Health Alcohol & Drug Education Series (contact 614-566-3700); 2) If another negative consequence is incurred as a result of using alcohol I recommend Mr. Dresvyannikov obtain an updated assessment and follow all professional recommendations.

Sincerely,

Brian Davis, LISW-S, SAP
cc: Oleg Dresvyannikov
